ABOUT ME

I am a passionate Full Stack developer with a strong interest in technology and innovation, highly adaptable and eager to keep learning. I stand out for working well in teams and facing challenges with determination.

EXPERIENCE

DUAL TRAINING AND INTERNSHIP (FCT)
VIEWNEXT (January 2025 – June 2025)

- Development of a team project as part of practical training, applying agile methodologies.
- Use of technologies such as Spring Boot, Angular, and Tailwind CSS for web application development.
- Management of MySQL databases using Docker containers.
- Deployment of applications on AWS.

DUAL VOCATIONAL TRAINING
VIEWNEXT (April 2024 – June 2024)

- Practical training in web development using Spring Boot and JavaScript.
- Acquisition and application of complementary technologies for full-stack development.

EDUCATION

HIGHER TECHNICIAN IN WEB APPLICATION DEVELOPMENT
C.P.I.F.P. Alan Turing, PTA (Málaga) **2023 – 2025**

CERTIFICATIONS:
- AWS ACADEMY CLOUD FOUNDATIONS

TELECOMMUNICATIONS INSTALLATION TECHNICIAN
C.P.I.F.P. Alan Turing, PTA (Málaga) **2021 – 2023**

TECHNOLOGIES

- C# - ASP.NET
- JAVA - SPRING BOOT
- REACT
- ANGULAR
- WEBSOCKETS (ASP.NET - REACT)
- CSS - TAILWIND CSS
- JAVASCRIPT - TYPESCRIPT
- MYSQL - SQLITE
- AWS - DOCKER - LINUX
- EFFECTOR
- FIGMA
- GIT - GITHUB
- JIRA
- VS CODE - VISUAL STUDIO

PROJECTS

PORTFOLIO: https://alejandro-barrionuevo-rosado.vercel.app

THE ENIGMA CASINO:
Full Stack development of a multiplayer online casino platform featuring games like Poker, Roulette, and Blackjack. Implemented WebSockets for real-time gameplay between users. Backend developed in C# with .NET 8 and MySQL/SQLite databases. Frontend built with React, using Effector for state management and styled with Tailwind CSS. Deployed on AWS.

AUTONEXT-CODE:
Full Stack development of a web platform for managing and booking electric vehicle charging stations in corporate environments. Features include advanced booking, attendance control, and an admin dashboard with reporting tools. Backend built with Spring Boot, frontend developed using Angular and Tailwind CSS. MySQL database in Docker environment and deployment on AWS. Project completed during the Work Placement (FCT).
